Hosted By: American Economic
Association / Econometric Society

Presiding: Lars Vilhuber, Cornell
University and AEA

Speaker(s)

Lars Vilhuber, Cornell University

Topic: Reproducibility at AEA

Miklos Koren, Central European
University

Topic: Reproducibility at Restud

Marie Connolly, UQAM

Topic: Reproducibility at the Canadian
Journal of Economics

Journals require that you share your code and data in a replication package upon acceptance. However, efficient reproducibility starts at the beginning of the research project. Following some best practices from day 1 can not only help you prepare a replication package later, but also make you a more

productive researcher. In this workshop, we start with an empty folder and finish with a mini-project about public procurement across various European countries, ready for submission to a journal. Together we discuss and document all the choices we make about data collection and analysis, in a way that can help future readers of our research. For advanced topics, see Session 2.

Topic: Data Handling

Miklos Koren, Central European
University

Marie Connolly, UQAM

In this second session, data editors from three journals will discuss best practices with respect to data issues and computational issues in complex replication packages. Confidential data, big data, proprietary data, simulated data, containers, custom software, high-performance computing are all possible topics. Questions from the audience are encouraged. Participants are encouraged to also attend Session 1.
