

January 21, 2020

I have not received any financial support for this project “Discrete Prices and the Incidence and Efficiency of Excise Taxes” from any interested parties. The entirety of my direct financial support has come from my primary employer the University of Michigan.

Nielsen Data were provided via an agreement between New York University (the employer of my co-author, Chris Conlon) and the Kilts Center at Chicago Booth.

The Distilled Spirits Council of the United States (DISCUS) is an industry organization that represents the major liquor distillers. They provided us access to the same dataset that most individual researchers do not have access to, but that industry members and other data providers (such as the publishers of the Liquor Handbook) do. That data was not used in this project, but only in a related project. Access to the data is the only thing I have accepted from the DISCUS organization.

Best regards,
