“Fueling Alternatives: Gas Station Choice and the Implications for Electric Charging”

I have received financial support from the University of Arizona to pursue this research, as part of my normal responsibilities as a professor. I received funding for a research assistant for this project jointly from the National Bureau of Economic Research (NBER) and the Sloan Foundation for the conference on Energy Use in Transportation. Neither the NBER nor the Sloan Foundation had any influence over the direction or results of this research.

I work as an expert witness on various projects for Cornerstone Research. In this capacity, I have served as an expert witness for Volkswagen Group of America (VW). This work was unrelated to electric vehicle sales, charging station networks, gasoline purchasing, or any other topic covered in this research. VW did not provide any support for this research project, financial or otherwise, or have any influence over the direction or results of this research.

A handwritten signature in blue ink, appearing to read 'A. Langer', with a long horizontal flourish extending to the right.
