

Manuscript Title: Optimal Voting Mechanisms on Generalized Single-Peaked Domains

Manuscript ID: AEJMicro-2022-0133.R2

Author: Tobias Rachidi

Disclosure Statement

I. Funding sources

The major funding sources for this research have been as follows:

- Doctoral scholarship of the Bonn Graduate School of Economics at the University of Bonn,
- Scholarship of the German Academic Exchange Service for a research stay at the Paris School of Economics,
- Employment contract with the University of Bonn funded by the German Research Foundation via the Hausdorff Center for Mathematics at the University of Bonn,
- Employment contract with the Fraunhofer Institute for Applied Information Technology FIT (a public research institute that belongs to the Fraunhofer Society, which is a large public research organization in Germany).

Subordinately, the research has been supported financially, and non-financially in the following ways:

- Scholarship of the German Academic Scholarship Foundation,
- Fellowship at the Collaborative Research Center TR 224 (cooperation of the University of Bonn, and the University of Mannheim) funded by the German Research Foundation.

II. Conflicts of interests

There are no conflicts of interests related to this research.

III. IRB approval

An approval by an institutional review board was not obtained because the research is entirely theoretical, and it did not involve humans participating as subjects.
