Default Options and Retirement Saving Dynamics

Taha Choukhmane
MIT Sloan School of Management

I acknowledge financial support from the Whitebox Advisors Fellowship at Yale University, the Social Security Administration through the Boston College Center for Retirement Research, and the Sloan Foundation through the NBER.

U.K. restricted-use data: this paper uses statistical data from the U.K. Office of National Statistics (ONS) which is Crown Copyright. The use of ONS statistical data does not imply the endorsement of the ONS in relation to the interpretation or analysis of the statistical data. The research was subject to a publication output clearance review to verify that no confidential information was disclosed. The data is accessible to approved researchers at the ONS Secure Research Service.

U.S. proprietary data: this paper uses proprietary administrative data from a U.S. 401(k) provider. The data sharing is governed by a data use agreement signed between MIT Sloan and the data provider—who has chosen not to be identified. The research was subject to a pre-publication review whose sole purpose was to review the scholarly work for any disclosure of confidential information. I have received no compensation or in-kind benefit from the data provider.
