Paper: How Transparency Kills Information Aggregation: Theory & Experiment

Journal: American Economics Review: Microeconomics

Author: Sebastian Fehrler

This project was supported by the Swiss National Science Foundation (grant 100017_150260/1).

No IRB approval was obtained for this project as neither the ETH Zurich nor the University of Zurich, whose joint subject pool we used, requires an IRB approval for this type of experiment. The DeSciLab (ETH Zurich), where our experiment was conducted, follows a strict no-deception rule and the lab manager made sure that we complied to it.

I declare that I have no relevant or material financial interests that relate to the research described in this paper.

Regards,
Sebastian Fehrler
